

Research on the operation and maintenance procedure of the Engstrom Pro ventilator

Nguyen Hong Nhat

Abstract: This topic aims to study and analyze the operational process and maintenance requirements of the Engstrom Pro ventilator in hospitals. Solving the problem of improving operational efficiency and extending the lifespan of the equipment is necessary to meet the demands of modern respiratory therapy. Through a combination of theoretical research and experimentation, the topic will provide detailed guidance on periodic and emergency maintenance, helping healthcare professionals enhance their medical equipment management skills. The expected results will contribute to improving the overall quality of respiratory healthcare services.

Keywords: Engstrom Pro ventilator, periodic maintenance, operating procedure, hospital, respiratory therapy
