

Research on Careplus infant incubators

Pham Thi Minh Trang

Abstract: This topic aims to research and deploy the advanced Careplus incubator system to improve the quality of care and health protection for newborns. To meet the increasing demands for safety and efficiency in the medical field, the article focuses on analyzing practical needs while combining theory with experimentation to build a highly automated incubator system. The expected results will provide important contributions to the field of neonatal medicine and elevate the technical standards of newborn care.
