

Building a Laptop Repair EBook

Pham Ngoc Thanh

Abstract: In the context of the rapid development of information technology, grasping and applying laptop repair skills is becoming increasingly important. This topic aims to build a specialized EBook on laptop repair to provide practical knowledge for users. The research method combines theory with experimentation, through synthesizing and analyzing existing sources of materials along with practical surveys at repair service centers. The topic hopes to contribute to the dissemination of technical knowledge to enhance users' self-repair capabilities.

Keywords: EBook, Laptop repair, IT techniques, Practical knowledge, Knowledge sharing
