

Improving the efficiency of using the Civil Status software in civil status management at the People's Committee of Tam Da Commune, Son Duong District, Tuyen Quang Province.

Le Thi Thuy Hang

Abstract: This topic aims to research and propose solutions to improve the efficiency of using the Civil Status software at the People's Committee of Tam Da commune, Son Duong district. The goal is to enhance productivity and accuracy in managing civil status records through the application of information technology. Through experimentation, the study combines theoretical methods with practical implementation to evaluate the effectiveness of the software system. The expected results will contribute to improving the quality of services for citizens and urban management in Tam Da commune.
