

Application of e-government software in document management at the People's Committee of Quang Long Commune, Hai Ha District, Quang Ninh Province

Hoang Thi Hien

Abstract: In the current context, the application of information technology in local government is becoming increasingly important. This topic aims to address the problem of improving the efficiency of document management at the People's Committee of Quang Long Commune, Hai Ha District, Quang Ninh Province by deploying e-government software. Through theoretical and experimental research, the topic expects to achieve the goal of building an effective document management support system, while reducing costs and improving work quality. This not only brings benefits to the People's Committee of Quang Long Commune but also contributes to the modernization of administrative management at the local level.
