

Application of information technology in document management at Vu Thu District People's Committee – Thai Binh Province

Ha Thi Hong

Abstract: In the current context, the application of information technology (IT) to document management at the People's Committee of Vu Thu District, Thai Binh Province is an urgent need to improve efficiency and professionalism. This research aims to build an IT-based document management system to enhance the processes of processing, storing, and retrieving information. The research method combines IT theory with local implementation experiments to ensure the feasibility of the proposed solution. The expected result is an effective document management system, contributing to improving the governance capacity and public services of Vu Thu District.
