

Application of Information Technology in the management of personnel records at the People's Committee of Cho Don District, Bac Kan Province

La Thi Lieu

Abstract: In the current context, the application of Information Technology (IT) to personnel record management has become an indispensable requirement to enhance the efficiency of human resources work. This thesis focuses on researching and deploying a digital management system for the People's Committee of Cho Don District, Bac Kan Province, aiming to address administrative reform challenges. Through the experimental process, the thesis applies a combination of theoretical research and experimentation to build an online personnel record management system. The expected outcome is to improve work productivity and the quality of human resource management in state agencies, while contributing to the improvement of administrative procedures in the digital era.
