

# **Building a program to manage Party member profile information at the Party Committee of Dong Cao Commune, Pho Yen Town, Thai Nguyen Province.**

**Nguyen Thi Ngat**

**Abstract:** This topic focuses on building a Party member record information management system for the Party Committee of Dong Cao Commune. In practice, the tracking and management of Party member records need improvement to meet the needs of the local Party Committee. The objective is to design and implement a comprehensive information management system to enhance management efficiency. The research method combines theory with practice, including current situation analysis and solution development based on advanced information technology. The expected result is that the application of this system will help reduce the workload for officials, increase transparency, and improve management effectiveness.
