

Improving the efficiency of human resource contract management at FPT Telecom Joint Stock Company – Thai Nguyen Branch

Do Thi Xuan Quynh

Abstract: In the context of the continuous development of FPT Telecom Joint Stock Company, improving the efficiency of human resource contract management at the Thai Nguyen branch has become urgent. This topic aims to build and implement an advanced human resource contract management system to optimize the recruitment, training, and performance evaluation processes. Through a combination of theoretical research and practical experimentation at a specific location, the topic is expected to make practical contributions to the company's human resource management activities, thereby enhancing productivity and flexibility in the operational system.

Keywords: Human resource contract management, FPT Telecom Joint Stock Company, Thai Nguyen Branch, Optimization of human resource management, Empirical research
