

# **Application of information technology in the management, monitoring, and implementation of work at the People's Committee of Tan Phu Commune, Pho Yen Town, Thai Nguyen Province.**

**Tran Thi Trang**

**Abstract:** This topic focuses on applying information technology (IT) to improve the performance and quality of management, monitoring, and work deployment at the People's Committee of Tan Phu commune, Pho Yen town, Thai Nguyen province. Through a combination of theoretical research and experimentation, the topic aims to build an information management support system to solve the problem of enhancing efficiency in the management activities of the commune People's Committee. The expected results provide the ability to track and update information in real-time, optimize work processes, and provide a platform for management decisions to be made based on accurate and timely data.

**Keywords:** Information technology, Work management, Management support system, Thai Nguyen, Experiment
