

Informatization of civil status management at Vũ Chấn Commune People's Committee, Võ Nhai District, Thái Nguyên Province

Tran Thi Tuyen

Abstract: This topic aims to analyze the current context of civil status management at the People's Committee of Vu Chan commune, Vo Nhai district, and determine the necessity of applying information technology. The objective is to build a civil status management system based on an IT platform to optimize the document processing workflow. The research method combines theory and experimentation to evaluate the system's effectiveness. Expected results will enhance management capacity and public services for citizens.

Keywords: IT modernization, civil status management, Commune People's Committee, IT system, process optimization
