

Application of information technology in the management of birth registration procedures at the People's Committee of Tien Yen Commune, Quang Binh District, Ha Giang Province

Hoang Thi Tuyen

Abstract: In the current context, the application of information technology (IT) to local government management activities is an inevitable need. This topic aims to research and deploy a birth registration management system at the People's Committee of Tien Yen commune, Quang Binh district, Ha Giang province. The goal is to improve the efficiency and transparency of the birth registration process through the use of IT. The research method combines IT theory with local implementation experiments. The expected results of this topic will significantly contribute to the sustainable development of the public administrative management system in the region.
