

Building a cash accounting program for the VNPT business center, Bac Giang.

Nguyen Thi Phuong Lan

Abstract: In the context of Vietnam's rapidly developing economy, effective financial management is one of the key factors determining the success of enterprises. This topic focuses on building a cash accounting program for the VNPT business center in Bac Giang, aiming to enhance the ability to control and analyze financial information to effectively support business management. Through a combination of theoretical research and empirical study, the topic aims to provide an intuitive and user-friendly application solution to optimize the cash accounting process. The successful implementation of this program will significantly contribute to improving the financial management efficiency of the business center, while promoting the digitalization of accounting operations.
