

Building an accounting program to determine business results at Long Giang Thai Nguyen Concrete Company Limited.

Nguyen Thi Thu Tham

Abstract: This topic focuses on building an automated system for report generation and business result determination for Long Giang Concrete Co., Ltd., aiming to enhance management efficiency and minimize errors in accounting data extraction. Through theoretical research on industrial accounting combined with empirical methods, the topic will develop a suitable technical solution for application in the enterprise. The expected outcome of this project is a significant improvement in business management capacity and the decision-making ability of the company's leadership.

Keywords: Industrial accounting, financial reporting automation, business management, information technology in accounting, reporting system
