

Building a training record and motorcycle driving license examination management program at Thai Ha Vocational School – Thai Nguyen.

Phan Van Phuc

Abstract: In the context of increasingly important student and driving skill management, this topic focuses on building a training record and examination management system for two-wheeled motorcycle driving licenses at Thai Ha Vocational School – Thai Nguyen. The objective of the research is to improve the management process, ensuring accuracy and efficiency in training. The research method includes analyzing real-world requirements, building a user-friendly interface, deploying the application, and evaluating the system. The expected results will bring convenience to students, teachers, and management agencies, while enhancing the quality of two-wheeled motorcycle driving training.
