

Analysis and assessment of Samsung Group's impact on the economy of Thai Nguyen province.

Vo Hong Thien Quan

Abstract: This thesis aims to analyze and evaluate the specific impact of Samsung Group on the economy of Thai Nguyen province. With the goal of identifying the key factors influencing and contributing to local economic development, the topic approaches the issue through a combination of theoretical research and empirical study. By collecting data from various sources such as business reports, local statistics, and interviews with economic experts, this thesis is expected to provide a comprehensive view of the relationship between Samsung and the economy of Thai Nguyen province. The research results not only help to better understand the impact of foreign corporations in Vietnam but also contribute to the formulation of sustainable development strategies for the locality.
