

Application of IT in salary management at Thanh Dat Joint Stock Company - Quang Ninh

Duong Le Son

Abstract: In the increasingly complex business context, applying Information Technology (IT) to salary management is an urgent need for Thanh Dat Joint Stock Company in Quang Ninh. This project aims to build an automated salary management system to optimize the payroll calculation and payment process. The research method combines practical analysis, current status assessment, and the implementation of IT solutions. The project is expected to bring significant efficiency in terms of time and management costs, while also contributing to improving the company's labor productivity.
