

Building an electronic contact book application on mobile devices for Nguyen Viet Xuan Primary School - Thai Nguyen

Bui Van Giap

Abstract: In the context of increasing demand for student information management, this topic focuses on building an electronic contact book application system for primary schools. The goal is to solve the problem of improving communication efficiency between schools and parents through mobile technology. The research method combines theory with experimentation, deploying the application on mobile devices. The expected result is a flexible, easy-to-use system that contributes to improving the educational process at Nguyen Viet Xuan Primary School - Thai Nguyen.
