

Building the online card game "Xì Tố" for Hoang Hiep Technology Joint Stock Company - Hanoi.

Nguyen Van Nam

Abstract: In the context of the strong development of information technology, building an online card game 'xì tố' to meet the entertainment and cultural exchange needs of players is an inevitable trend. This project aims to create a professional online card game system, providing an enjoyable experience for users while helping Hoang Hiep-Hanoi Technology Joint Stock Company expand its business market. Through theoretical research and practical application deployment, the project hopes to contribute to improving the quality of online card game services in Vietnam, meeting advanced technical requirements and high security standards.
