

Building a production cost accounting and product costing program for Viet Hoa - Hanoi Production and Trade Development Company Limited

Ma Thi Cham

Abstract: In the context of increasingly emphasized financial management, this topic aims to solve the problem of optimizing the production cost management process at Viet Hoa - Hanoi Production and Trade Development Company Limited. Through a combination of theoretical research and experimentation, the goal is to build a system of production cost accounting programs and product cost calculation suitable for the specific operational characteristics of the company. The expected result is to help the enterprise improve financial management efficiency, ensuring stability and sustainable development.

Keywords: cost accounting, management system, production, cost calculation, application software
