

Using TCSOFT software to improve the efficiency of managing emulation and reward records at the People's Committee of Dai Yen Ward - Ha Long City - Quang Ninh Province

Tran Ngoc Mai

Abstract: In the practical context, the management of emulation and reward records at the People's Committee of Dai Yen Ward faces many limitations, affecting operational efficiency. This topic aims to build a management system for emulation and reward records using TCSOFT software to enhance work performance and quality. Through the research process, applying a combination of theoretical and experimental methods, the topic aims to provide a modern technical solution that meets the requirements for scientific and transparent management of emulation and reward records. The expected results will contribute to improving work processes and enhancing work productivity at the People's Committee of Dai Yen Ward.
