

Building a human resource management website for VNPT Thai Nguyen.

Nguyen Thi Hau

Abstract: This topic aims to develop a web-based human resource management system suitable for the needs of Thai Nguyen Telecommunications Joint Stock Company (VNPT Thai Nguyen). Building this system addresses the issues of work performance and user experience in the human resource management process. Through research, the topic uses a combination of human resource management theory and practical web application deployment to ensure effectiveness. The expected result is an easy-to-use system that enhances the performance and management capacity of VNPT Thai Nguyen's human resources.

Keywords: Human resource management website, Thai Nguyen Telecommunications Joint Stock Company (VNPT), Empirical research
