

Build a website to sell and introduce services for HPC Mobile store - Thai Nguyen

Nguyen Van Hoa

Abstract: This topic focuses on building a web system to sell and introduce the services of HPC Mobile store in Thai Nguyen. During the research process, we analyzed customer and business requirements to identify the main functions needed on the website. Accordingly, the topic uses a method combining theory with experimentation to design a user-friendly interface along with effective sales features. The expected results will bring convenience to customers in shopping and help HPC Mobile store enhance brand awareness in the market.

Keywords: Website, Online sales, Mobile services, Thai Nguyen, User interface design
