

Building an online document sharing website for Phu Luong High School - Thai Nguyen

Dao Mai Hong

Abstract: In the context of educational modernization, building an online document sharing website at Phu Luong High School - Thai Nguyen is an essential need. The objective of this project is to develop a system that allows for fast and convenient storage and access to information between teachers and students. Through theoretical research combined with experimentation, the project focuses on designing a user-friendly interface and optimizing page load performance to meet the needs of the school community. The implementation of this system not only improves the educational process but also makes an important contribution to the automation of document management in educational institutions.
