

Building a scientific profile management website for faculty members of Thai Nguyen University of Education

Bui Tien Uy

Abstract: In the context of the need to improve information management efficiency and support the teaching and research activities of faculty members at Thai Nguyen University of Education, this project focuses on building a website system to manage scientific schedules. The main objective is to enhance the accessibility and usability of information related to the university's research and teaching activities. The implementation method is based on a combination of theoretical research on information technology with applied experimentation to develop a user-friendly interface and effective management functions. The expected outcome is that the launch of the website system will strengthen the organization and exchange of information, contributing to improving the quality of teaching and research.
