

Building an English practice application on the Android operating system.

Pham Thi Kieu Trang

Abstract: In the context of the rapid development of information technology, the use of mobile applications to support foreign language learning is becoming increasingly popular. This topic focuses on building an English practice application on the Android operating system to meet the self-study needs and improve users' language skills. Through the research process, the topic combines theories of foreign language teaching methods with practical application development. The ultimate goal is to create an effective, easy-to-use learning solution that can be customized according to the individual needs of each learner. The expected results of this project will affirm its applicability and potential contribution to the field of digital education.
