

Build an online programming learning website for Minh Duc online software company.

Le Thi Hue

Abstract: In the context of the development of the Information Technology (IT) industry, providing online learning platforms has become important for training programming skills. This project aims to build an online programming learning website for Minh Duc online software company, meeting the demand for high-tech education. Through theoretical and experimental research, the project will focus on designing a user-friendly interface, a flexible content management system, and effective learning support features. The expected results will bring significant benefits to the company by expanding the training market and improving the quality of human resources.
