

Building a learner management website at the Pham Hung High-Quality Training and Exam Preparation Center.

Le Quy Vinh

Abstract: In the modern context, effectively managing learner information is an urgent need for educational centers. This topic focuses on building a learner management website to improve the quality and operational efficiency of the Pham Hung Exam Preparation and Training Center. The research objective is to develop a web system integrating multiple features such as managing personal information, exam schedules, and learning results. The general methodology includes requirements analysis, user interface (UI/UX) design, and application deployment. It is expected that the completion of this topic will significantly contribute to information management technology and provide an effective digital platform for the center.
