

Some common personal computer errors and how to fix them

Nguyen Dang Manh

Abstract: In today's digital age, the use of personal computers is indispensable in all fields of activity. However, common errors in personal computer systems are causing inconvenience for users. This topic aims to explore and analyze common personal computer errors from a technical perspective, while proposing effective solutions to address them. Through a combination of theoretical research and experimentation, the project seeks to provide users with detailed guidance on how to prevent and handle common issues, thereby enhancing the ability to use personal computers efficiently and safely.

Keywords: personal computer error, error troubleshooting, system administration
