

Research on some communication network solutions and building a teaching support system for related subjects in the Communication Technology department.

Hoang Thi Sang

Abstract: This topic aims to study several modern communication network solutions with the goal of building a teaching support system for related subjects in the Communication Technology department. Through analyzing the current situation and teaching needs, the topic applies a combination of theoretical research and experimental methods to propose appropriate technical solutions. The expected result is to create an effective system to enhance the quality of teaching and learning, while contributing to the development of communication technology.

Keywords: Communication network solutions, Teaching support, Communication technology
