

# **Building a fixed asset accounting program for Nam Sao Co., Ltd. - Hanoi**

**Bui Thi Ngoc Anh**

**Abstract:** In the context of increasingly complex financial management, this topic focuses on building a fixed asset management system for Nam Sao - Hanoi Company Limited. The objective of the research is to design and implement an automated accounting program to optimize the fixed asset management process. The approach combines theoretical research on financial management with practical application of software technology in enterprises. Through this, the topic is expected to deliver practical value by improving asset management efficiency and reducing financial risks for the company.

**Keywords:** Fixed asset accounting, financial management, software technology, enterprise, optimization
