

Development of a cash-based accounting system at HEAT TECHNOLOGY Vietnam Co., Ltd.

Nguyen Thi Hanh

Abstract: This topic focuses on developing and implementing a cash-based accounting management system for KD HEAT TECHNOLOGY Vietnam Co., Ltd. In the context of businesses increasingly requiring high accuracy in financial management, the objective of the research is to build a specialized solution to optimize the recording and control of cash capital. The approach combines analyzing the actual needs of the business with a trial implementation of the system. The expected results of the topic are not only to improve financial management performance but also to contribute significantly to the sustainable development of the company.

Keywords: Cash capital accounting, financial management, accounting system, HEAT TECHNOLOGY CO., LTD., enterprise
