

Building an accounting program for fixed asset depreciation at Nguyen Phat Trading and Mineral Joint Stock Company, Cau Giay, Hanoi.

Tran Thi Lien

Abstract: This topic aims to research and build an automated accounting system for fixed asset depreciation for Nguyen Phat Trading and Mineral Joint Stock Company. The main objective of the project is to optimize the accounting process, minimize errors, and enhance the company's asset management efficiency. The implementation method is based on a combination of theoretical research on fixed asset accounting and practical application deployment within the enterprise. The expected result is a robust accounting system that contributes to promoting the sustainable development of the Company.

Keywords: Accounting, depreciation of fixed assets, joint stock company, asset management
