

Building a financial report analysis program for Vinh Giang Joint Stock Company, Truc Ninh District, Nam Dinh Province.

Tran Thi Nguyen

Abstract: In the current economic and financial context, the management and analysis of financial reports have become extremely important for Vinh Giang Joint Stock Company. This topic aims to build an automated analysis system for financial reports to support more effective corporate governance. Using a combination of theoretical research and empirical methods, the topic will focus on selecting and implementing appropriate algorithms to provide accurate and timely financial information. The expected result is a digital solution that enhances the company's financial analysis capabilities.
