

Building an accounts receivable accounting program at Tan Binh Company Limited - Hai Duong

Nguyen Thi Nhung

Abstract: In the context of financial management increasingly demanding efficiency and standards, this topic focuses on building an automated system for processing customer debt information for Tan Binh - Hai Duong Company Limited. The objective is to develop a solution to optimize the process of collecting receivables from customers. The research method combines current situation analysis, model design, and practical application deployment. The topic is expected to contribute to improving business operational efficiency and enhancing the quality of the company's accounting services.

Keywords: Accounts receivable, automation, debt management system, Tan Binh - Hai Duong Company Limited, digital solution
