

Building and perfecting the management program for the fixed asset accounting subsystem at PS VINA Co., Ltd. in Thai Binh Province.

Hoang Thi Thao

Abstract: The study proposes building and perfecting a management program for the fixed asset accounting subsystem at PS VINA Company Limited in Thai Binh province to meet the requirements of modernizing enterprise asset management. The approach combines theoretical and experimental research, ensuring comprehensiveness in the design and implementation process. The main objective is to develop an information system to enhance the efficiency of fixed asset management. The topic is expected to make a significant contribution to the application of information technology in accounting operations at the enterprise.
