

Building a contract-based medical examination and treatment management program for Pho Yen General Hospital - Thai Nguyen Province

Nguyen Thi Thoa

Abstract: In the context of the healthcare sector becoming increasingly developed and professionalized, building a contract-based medical examination and treatment management system at Pho Yen General Hospital - Thai Nguyen province has become an urgent need. This study aims to design and implement a management system to optimize the healthcare process for patients under medical contracts. The research methodology includes analyzing the current situation, building a model, and deploying the application. The expected results will contribute to improving the quality of medical services and enhancing the management efficiency of the hospital.
