

Building an online book sales website for Van Tien bookstore.

Hoang Thi Canh

Abstract: This topic focuses on building an online book sales website system to support Van Tien bookstore in expanding its business and serving customers effectively. Through theoretical research on e-commerce and practical application deployment, the goal of the topic is to create a user-friendly interface, ensure information security, and facilitate a smooth purchasing process for both sellers and customers. The expected results of the topic not only contribute to the business development of Van Tien bookstore but also provide a practical solution for other bookstores wishing to undergo digital transformation.

Keywords: e-commerce, online book selling website, sales management system, online business, mobile application
