

Building a Website to manage Training Departments for Global Trade and Education Promotion Joint Stock Company

Ha Thi Thuy Yen

Abstract: In the context of modern education, effective management of training faculties plays a crucial role in the sustainable development of educational organizations. This topic aims to address this issue by building a dedicated Website system to monitor and manage teaching activities at training faculties. Through theoretical research combined with experimentation, the topic will deploy modern technology applications to improve management performance. The expected results not only contribute to the development of the education sector but also bring significant benefits to the Global Trade and Education Promotion Joint Stock Company.

Keywords: Management website, Training department, Educational information system, Management technology, Educational organization
