

# **Building an online Laptop sales website for TNC-Thai Nguyen computer company**

**Nguyen Tuan Anh**

**Abstract:** This topic focuses on building an online laptop sales website to enhance the business efficiency of TNC-Thai Nguyen Computer Company. The objective is to develop a user-friendly interface, integrating fast ordering and payment features. The research methodology includes analyzing customer requirements, designing the backend and frontend systems, and deploying the application in a real-world environment. The expected result is to provide an optimal technical solution for the e-commerce sector in the computer industry, contributing to improved revenue and user experience.

**Keywords:** Online laptop sales website, E-commerce, TNC Computer Company - Thai Nguyen, User interface, Application testing
