

Building a boarding house management application for Tung Thao Nguyen private enterprise - On the Windows Phone platform - Thai Nguyen

Hoang Van Dai

Abstract: This topic focuses on building a room rental management application specifically for private enterprises in Thai Nguyen province, aiming to meet the need for optimizing the management process of housing and tenants. Through a combination of theoretical research and practical deployment on the Windows Phone platform, the topic will provide an effective technical solution, helping enterprises improve service quality and enhance customer satisfaction. The expected result is an application that meets the requirements for managing diverse information about rental rooms while being easy to use on mobile devices.

Keywords: Room rental management application, private enterprise, Windows Phone, Thai Nguyen, housing management
