

Learn about AndEndEngine and its application in building the online game "Tien Len Mien Nam".

Nguyễn Mạnh Hùng

Abstract: This topic aims to study and evaluate AndEndEngine - an effective mobile game development tool. The main objective is to build an online Tiến lên miền Nam game system based on the AndEndEngine platform, addressing the problem of enhancing user experience through an attractive interface and direct interaction between players. Through a combination of theoretical research and experimentation, the topic aims to provide a practical technical solution for mobile game development and contribute to the mobile gaming field.

Keywords: AndEndEngine, Online game, Game development, Thirteen (Tiến lên miền Nam), Game development techniques
