

Building an online English learning website for the foreign language center of Que Vo 2 High School - Bac Ninh

Vũ Thị Lan Anh

Abstract: This topic focuses on building an online English learning website to meet diverse and flexible learning needs at the Foreign Language Center of Que Vo 2 High School, Bac Ninh. The objective of the research is to develop an effective teaching and learning support system through digital technology. The method combines educational theory with web technical experimentation to build a visual and highly interactive learning interface. The project is expected to significantly contribute to improving the quality of foreign language education at general education institutions, while expanding access to standard learning resources.

Keywords: English learning website, Language Center, Online Education
