

Learn about Vector images in online printing and online design applications for thietkeao.com

Nguyen Xuan Minh

Abstract: This topic focuses on researching vector images in online printing and applying the acquired knowledge to the online design system for thietkeao.com. The context of the topic stems from the increasing demand for image quality in the online printing industry, especially with the popularity of vector images. The objective of the research is to build a solution that optimizes the design and production process of printed products by using vector image technology. The applied methods include collecting data on the features and applications of vector images, analyzing real-world use cases, and conducting direct testing on the thietkeao.com system. The expected results will bring significant improvements in design performance and quality, contributing to promoting innovation in online printing technology.

Keywords: vector image, online printing, online design
