

Assessing the current situation & proposing solutions to improve the quality of computer practice in the lab for students at Thai Nguyen University of Education.

Nguyen Thi Ngoc

Abstract: In the context of rapidly developing information technology education, assessing the current situation and proposing solutions to enhance the quality of computer science practice for students at Thai Nguyen University of Education has become urgent. This study aims to identify the current limitations in students' computer science practice, thereby building a practical and effective support system. The research methods include document evaluation, interviews with teachers and students, as well as analysis of relevant materials. It is expected that the results of this study will significantly contribute to improving training quality and providing a foundation for sustainable development in the field of information technology at the university.
