

Building a mobile device sales website for Nhật Cường Mobile Company (Hanoi) using Codeigniter Framework 2.x

Pham Van Hien

Abstract: This topic focuses on building an e-commerce website system specializing in selling mobile devices for Nhat Cuong Mobile Company, aiming to meet diverse customer needs and optimize the sales process. Through a combination of theoretical research and experimentation, the topic applies the Codeigniter 2.x Framework to develop the website system. The expected results contribute to improving business performance through a user-friendly interface and diverse functions, while providing suitable technical solutions for technology enterprises.

Keywords: Sales website, Codeigniter Framework 2.x, Mobile devices, E-commerce, Nhat Cuong Mobile Company
