

Building a postgraduate admission management program for Thai Nguyen University of Information and Communication Technology.

Nguyen Duc Manh

Abstract: In the era of educational modernization, building a graduate admission exam management system has become an urgent need. This topic focuses on designing and implementing an admission exam management program to optimize the admission process and improve training quality at Thai Nguyen University of Information and Communication Technology (THICTT). Through a research process combining theory and experimentation, the topic aims to contribute to improving the efficiency of the admission process while reducing the workload for administrative staff. Expected results include a professional management system that enhances admission quality and creates a fair admission environment.
