

Building a website to create and manage online courses.

Bui Van Cong

Abstract: In the context of the increasingly developing digitalization of education, this topic focuses on building a website system for creating and managing online courses. The objective of the research is to solve the problem of improving content management efficiency and user experience in the online learning environment. The approach includes both theoretical research on web design and practical application deployment to ensure feasibility. The expected results will bring many contributions to the e-learning industry, helping to create an effective digital platform for educational institutions.

Keywords: Online learning website, course management, e-learning, web design, practical application.
