

Building an online English exam preparation website

Vuong Van Thu

Abstract: In the context of education increasingly focusing on improving students' foreign language proficiency, this topic focuses on building a website system to support online English exam preparation. The goal is to create an effective digital platform to help learners master the knowledge and skills required for the exam. The research method is based on a combination of experimentation with the application of new technology, aiming to ensure that the learning content aligns with exam requirements. The project hopes to make a significant contribution to improving the quality of foreign language education in the country.
