

Building a website to promote products and sell online for Tribeco Northern Company Limited - Hung Yen

Nguyen Thi Bich Lien

Abstract: This topic aims to meet the online business development needs of Tribeco Northern - Hung Yen Company Limited through the construction of a professional website. The main objective is to create an effective digital platform, helping the company introduce products and conduct online commercial transactions. Through a process of theoretical research combined with practical application deployment, the topic aims to provide a comprehensive solution for website building, from interface design to content management and order processing. The expected result is a system that well meets the requirements for aesthetics, convenience, and security of e-commerce, while promoting the company's business performance.
